

Western Australian Bicycle Network Grants Program 2024-25 to 2027-28

Regional Bike Network – awarded projects

The following details the regional projects that successfully applied for funding through the recent WABN Grants Program intake, as well as pre-committed projects and related initiatives.

Grants are staged across multiple years, with some projects and initiatives already committed through the previous grant round.

In the current grant round, 45 new projects totalling \$13.4 million have been successful, which will see the design and delivery of new shared paths across 27 local governments. These projects will specifically enhance connectivity to key tourism destinations and regional city centres.

Combined with already committed projects and related initiatives, this brings the total Regional Bike Network (RBN) program commitment to approximately \$16.7 million to deliver 78 projects and three related initiatives between 2024-25 and 2027-28.

See project schedule below. Please note:

- Figures are to the nearest dollar – there may be minimal discrepancies based on actual/true dollar and cents figures.
- Aboriginal languages, spelling and stories are passed verbally from generation to generation and may differ in specifics for different Aboriginal communities. DoT has included references to Aboriginal Country to the best of its ability, in consultation with the Transport Portfolio Aboriginal Engagement branch.
